

Cochrane Library

MAEDEH ESMAILZADEH

AMIN HOSPITAL LIBRARY

2023

کتابخانه کاکرین که از سال 1993 توسط بنیاد همکاری کاکرین و دیگر سازمان‌ها ایجاد شد، مجموعه ای متشکل از پایگاه‌های اطلاعاتی در زمینه پزشکی و شاخه های مربوط به بهداشت و درمان می‌باشد.

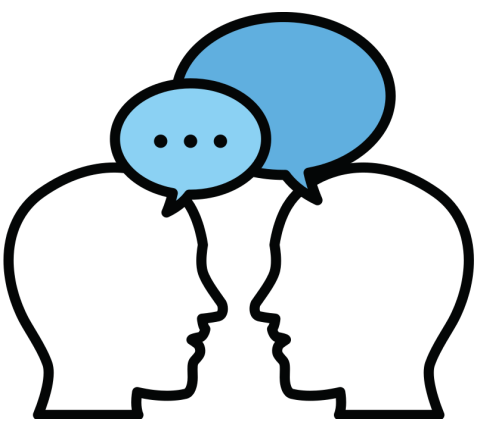

این پایگاه گردآورنده ی برترین شواهد پزشکی موجود، حاصل از پژوهش‌های علمی و تجربی صورت گرفته در حوزه ی بهداشت و درمان است.

اعضای سازمان کاکرین مجموعه ای از محققان و متخصصان حوزه بهداشت و درمان هستند که در قالب 53 گروه تخصصی سازماندهی شده‌اند.

کتابخانه کاکرین یک پایگاه اطلاعاتی مبتنی بر اشتراک (Subscription) می باشد.

هم اکنون بخشی از سیستم آنلاین وایلی (Library Online Wiley) است.

- این پایگاه اطلاعاتی علاوه بر انگلیسی به زبان اسپانیایی نیز در دسترس است.
- بیش از **45000** ترجمه از خلاصه شواهد سلامتی کاکرین به **15** زبان منتشر شده است.
- زبان فارسی جز زبان های ترجمه شده کاکرین است.

COCHRANE DATABASE OF SYSTEMATIC REVIEWS (CDSR)

پایگاه داده مرورهای نظام مند کاکرین شامل مرورهای (سیستماتیک، مداخله‌ای، تشخیصی، متدولوژی، کیفی و پیش‌آگهی، مرور سریع)، مطالعات متآنالیز و پروتکل‌های اجرای مرورهاست

این پایگاه هسته اصلی و برونداد اولیه بنیاد همکاری کاکرین است که برجسته‌ترین منابع موجود در زمینه مرورهای نظام مند را گردآوری کرده است.

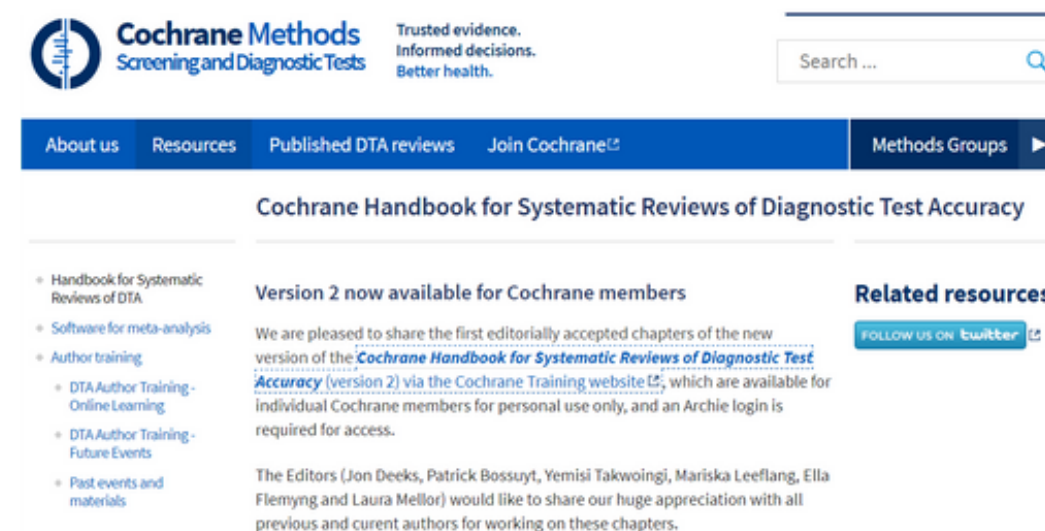

این پایگاه پراستفاده‌ترین پایگاه کاکرین است که پس از به روز رسانی جدیدترین یافته‌های شواهد بالینی را در دسترس قرار می‌دهد.

Types of Cochrane Review

- **Intervention reviews** assess the effectiveness/safety of a treatment, vaccine, device, preventative measure, procedure or policy.
- **Diagnostic test accuracy reviews** assess the accuracy of a test, device or scale to aid diagnosis.
- **Prognosis reviews** describe and predict the course of individuals with a disease or health condition.
- **Qualitative evidence syntheses** investigate perspectives and experiences of an intervention or health condition.
- **Methodology reviews** explore or validate how research is designed, conducted, reported or used.
- **Overviews of reviews** synthesize information from multiple systematic reviews on related research questions.
- **Rapid reviews** are systematic reviews accelerated through streamlining or omitting specific methods.
- **Prototype reviews** include other types of systematic review that do not yet have established standard methodology in Cochrane, such as scoping reviews, mixed-methods reviews, reviews of prevalence studies, and realist reviews.

تهیه و نظارت بر مرورهای نظام‌مند کاکرین که مورد هم‌ترازی داوری (peer-review) قرار می‌گیرند توسط تیم ویراستاری گروه‌های مروری کاکرین (Cochrane Review Group) و بر اساس کتاب کاکرین برای مرورهای سیستماتیک مداخلات (Cochrane Handbook for Systematic Reviews of Interventions) و کتاب کاکرین برای صحت آزمون‌های تشخیصی (Cochrane Handbook for Diagnostic Test Accuracy Reviews) انجام می‌گیرد.

<https://methods.cochrane.org/sdt/handbook-dta-reviews>

The screenshot shows the Cochrane Methods website for Screening and Diagnostic Tests. The header includes the Cochrane logo and the tagline "Trusted evidence. Informed decisions. Better health." A search bar is located in the top right. The navigation menu includes "About us", "Resources", "Published DTA reviews", "Join Cochrane!", and "Methods Groups". The main content area is titled "Cochrane Handbook for Systematic Reviews of Diagnostic Test Accuracy". It features a list of resources on the left, including the handbook for Systematic Reviews of DTA, software for meta-analysis, and author training. The main text announces that Version 2 of the handbook is now available for Cochrane members, with a link to the Cochrane Training website. A "Related resources" section includes a "Follow us on Twitter" button. The footer mentions the editors: Jon Deeks, Patrick Bossuyt, Yemisi Takwoingi, Mariska Leeflang, Ella Fieming, and Laura Mellor.

Cochrane COVID-19 Study Register

The screenshot displays the Cochrane COVID-19 Study Register interface. At the top left is the logo and tagline: "Cochrane COVID-19 Study Register. Trusted evidence. Informed decisions. Better health." A search bar is located at the top right. Below the header, there are navigation options: "Select All", "Order by" (set to "Newest First"), and "Results per page" (set to "15"). A status bar indicates "Showing 1 - 15 of 236,209 studies with 253,605 references" and includes pagination links "Prev 1 2 3 4 5 6 7 Next".

The main content area is divided into several sections:

- NEW STUDIES:** A list of studies added recently, with counts for "Last Day", "Last 3 Days", "Last Week", "Last Month", and "Last 3 Months".
- UPDATED NEW REFERENCES:** A list of newly added references, with counts for "Last Day", "Last 3 Days", "Last Week", "Last Month", and "Last 3 Months".
- STUDY REFERENCE TYPE:** A breakdown of study types: Journal Article (213,942), Trial Registry Record (17,831), and Preprint Article (10,664).
- RESULTS AVAILABLE:** A breakdown of results: Report Results (219,250) and No Results (15,276).
- STUDY CHARACTERISTICS:** A breakdown of study types: Observational (206,400) and Interventional (11,583).

The central part of the page shows a list of individual study entries, each with a checkbox, a study ID, a title, and a grid of filters:

- Study 1:** ID: EUCTR2022-003452-14-F1. Title: "To investigate efficacy, pharmacodynamics, and safety of BC 007 in participants with long COVID". Filters: Study Type (Other), Study Aim (Treatment And Management), Study Design (Parallel/Crossover), Intervention Assignment (Randomised). Includes a "References (1)" link.
- Study 2:** ID: CHCTR2300078127. Title: "Cross-neutralization of convalescent sera from patients infected with novel coronavirus to COVID-19". Filters: Study Type (Other), Study Aim (Treatment And Management), Study Design (Cross-Sectional), Intervention Assignment (Not Applicable). Includes a "References (1)" link.
- Study 3:** ID: CHCTR2300078082. Title: "Immune Responses to COVID-19 Booster Vaccine With and Without Ganoderma Lucidum Spore Powder". Filters: Study Type (Other), Study Aim (Prevention), Study Design (Parallel/Crossover), Intervention Assignment (Randomised). Includes a "References (1)" link.
- Study 4:** ID: NCT04254137. Title: "Characteristics of Blood Glucose Variability in Patients With Type 2 Diabetes Mellitus Complicated With COVID-19 and its Effect on the Prognosis of the Disease". Filters: Study Type (Observational), Study Aim (Epidemiology), Study Design (Case Series/Case Control/Cohort), Intervention Assignment (Not Applicable). Includes a "References (1)" link.

پادکست: چگونه می‌توانیم با افراد و جوامع در مورد اقداماتی که به پیشگیری و کنترل کووید-19 کمک می‌کنند، ارتباط بهتری برقرار کنیم؟

برقراری ارتباط شفاف با عامه افراد در سطح جامعه، بخش کلیدی پاسخگویی به بلایا و فوریت‌های سلامت است. به‌روزرسانی انجام‌شده در اکتبر 2023 از یک مرور سریع که در سال ۲۰۲۰ منتشر شده بود، به بررسی این موضوع در رابطه با اقدامات کمک‌کننده به پیشگیری و کنترل کووید-19 می‌پردازد. این پادکست مصاحبه «مایک کلارک»، سردبیر پادکست در کتابخانه کارین با نویسنده اصلی مقاله، «ریکا رایان» (Rebecca Ryan) از دانشگاه «لاتروب» (La Trobe) استرالیا است که مرکز کارین ایران آن را ترجمه و ضبط کرده است.

Cochrane Central Register of Controlled Trials (CENTRAL)

پایگاه مرکز ثبت مطالعات کارآزمایی بالینی کاکرین وسیعترین مجموعه مربوط به کارآزمایی‌های بالینی در جهان است.

شامل جزئیات کارآزمایی‌های منتشر شده برگرفته از پایگاه‌های اطلاعاتی کتابشناختی بخصوص MEDLINE و EMBASE است.

این پایگاه شامل اطلاعاتی در مورد عنوان مقاله، محل نشر مقاله، و در بسیاری از موارد چکیده مقاله است.

هر یک از گروه های مروری کاکرین مجموعه ای از کارآزمایی های بالینی مرتبط با
حیطه فعالیت خود با عنوان Specialized Registers
و موارد غیر مرتبط با حیطه فعالیت خود به نام نتایج جستجوی دستی
Handsearch results جمع آوری می کنند.

مجموعه رکوردهای مرتبط برگرفته از EMBASE و MEDLINE، هم چنین
مجموعه های Specialized Register و (نتایج جستجوی دستی) پایگاه
CENTRAL را تشکیل می دهند.

Cochrane Clinical Answers

Question:

What is the accuracy of immunoglobulin G (IgG) and IgM antibody tests for the detection of current SARS-CoV-2 infection?

Sera Tort, Agustín Ciapponi
24 November 2022
<https://doi.org/10.1002/cca.4160>

Clinical Answer:

Using reverse transcription polymerase chain reaction (RT-PCR) as the reference standard, in people with suspected or confirmed SARS-CoV-2 infection, the reviewers reported the sensitivity of IgG and IgM antibody tests (alone or in combination) for detection of SARS-CoV-2 infection across five time points. For IgG alone, average pooled sensitivity was 27.2% at 1 to 7 days, 64.8% at 8 to 14 days, 88.1% at 15 to 21 days, 92.6% at 22 to 28 days, and 93.5% at 29 to 35 days. Pooled sensitivities for IgM alone were 29.5%, 64.6%, 78.3%, 63.8%, and 59.8%, respectively. Pooled sensitivities for IgG or IgM were 41.1%, 74.9%, 88.0%, 91.3%, and 94.4%, respectively. At a prevalence of 2%, 8 (95% CI 5 to 15) people would be falsely positive and 2 (95% CI 2 to 3) would be missed, for every 1000 people undergoing IgG or IgM testing in week three after onset of SARS-CoV-2 infection. The reviewers pooled specificities across all time points for each test; average specificity ranged from 98.6% for IgM to 99.8% for total antibodies. It is worth noting that all of the included studies were at high risk of bias for at least one of the four quality criteria assessed.

بیش از 90 درصد از CCA بر اساس مرورهای مداخله‌ای است که نتایج متاآنالیزهای زوجی را گزارش می‌کند.

به منظور مشارکت، پزشکان متخصص، متخصصان مراقبت بهداشتی و افراد با تجربه بالینی کافی، میتوانند در زمینه تخصص خود به تیم تحریریه CCA مشاوره دهند. در صورت تمایل به عنوان مشاور بالینی یا سردبیر میتوانند رزومه خود را به ایمیل تیم CCA ارسال نمایند.

Special Collections

مجموعه‌های محتوایی تحت موضوعات خاص مراقبت‌های بهداشتی هستند.

McMaster Health Forum

کتابخانه کاکرین در جست و جوی یکپارچه امکان دسترسی به منابع اصلی شامل شواهد سیستم‌های بهداشتی (HSE) و شواهد سیستم‌های اجتماعی (SSE) را از طریق باکس جست و جو در صفحه اصلی ایجاد می‌نماید. این ویژگی در برگه‌های جستجوی پیشرفته در دسترس نیست.
