# معرفی مقدماتی پایگاه اسکاپوس

---

❖ پایگاه اطلاعاتی اسکاپوس بزرگترین پایگاه استنادی و چکیده نویسی جهان است که توسط الزویر ناشر هلندی ساینس دایرکت در سال ۲۰۰۴ راه اندازی شده در واقع یکی از رقیبان پایگاه استنادی موسسه اطلاعات علمی ( Web of Science ) آمریکا می باشد.

❖ این پایگاه ابزار خوبی برای پژوهشگران در حوزه‌های مختلف است که نه تنها اطلاعات مقالات و چکیده آنها بلکه میزان استنادات آنها را نیز بیان می کند.

❖ علاوه بر جستجو و دسترسی به مقالات معتبر می توان فعال ترین نویسندگان، سازمان، مراکز تحقیقاتی و مجلات هسته را در حوزه موضوعی خاص تعیین و رتبه بندی کرد.

# پوشش موضوعی

❖ اسکاپوس آسان ترین راه برای اخذ فهرست های مربوط به موضوعات است. با این ابزار محققین وقت کمتری را برای جستجو و وقت بیشتری را می توانند صرف تحقیقات خود نمایند.

❖ در تمام زمینه های علوم اطلاعات مروری گسترده ای از جهان علمی را که محققان، اساتید و فراگیران نیاز دارند ، در اختیار قرار می دهد.

There are 27,950 titles in Scopus.

Life (علوم اعصاب، داروشناسی، زیست شناسی)

# درصد پوشش موضوعی ۴ حیطة اصلی

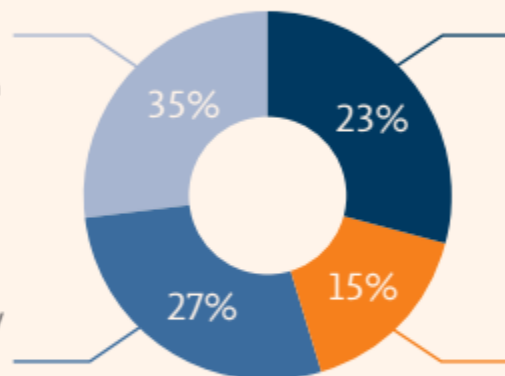

Publications per major subject area\*:

## Social Sciences

11.5+ thousand titles in arts & humanities; business, management & accounting; decision sciences; economics, econometrics & finance; psychology; social sciences

## Physical Sciences

9.0+ thousand titles in chemical engineering; chemistry; computer science; earth & planetary sciences; energy; engineering; environmental science; materials science; mathematics; physics & astronomy

## Health Sciences

7.5+ thousand titles in medicine; nursing; dentistry; health professions; veterinary

## Life Sciences

5.1+ thousand titles in agriculture & biological sciences; biochemistry, genetics & molecular biology; immunology & microbiology; neuroscience; pharmacology, toxicology & pharmaceuticals

\*Counts include only active titles. Titles may fall into more than one major subject area. Scopus is updated daily, so numbers are subject to change. Figures are rounded to the nearest decimal point. Source: Scopus title list, December 2021.

# پوشش بر اساس نوع منابع

❖ انتشارات سریالی اسکاپوس در این بخش شامل Journals، Trade journals، Book series، و Conference material می‌باشد.

❖ از دیگر منابع میتوان به Patents (بیش از ۴۹.۲ میلیون ثبت اختراع) اشاره کرد که از پنج مورد مشتق شده است:

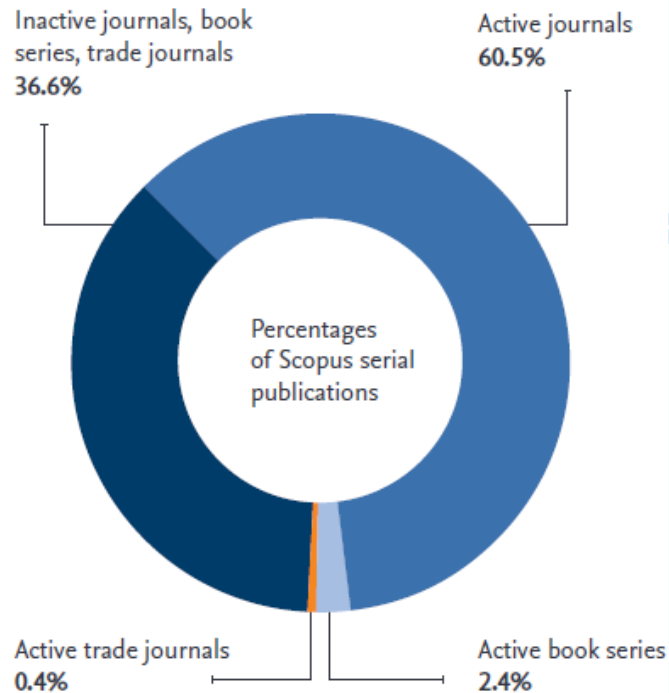

1. سازمان جهانی مالکیت فکری WIPO

2. اداره ثبت اختراع اروپا EPO

3. اداره ثبت اختراع ایالات متحده USPTO

4. اداره ثبت اختراعات ژاپن JPO

5. دفتر مالکیت معنوی انگلستان IPO.GOV.UK

\*Conference series are not displayed in this graph

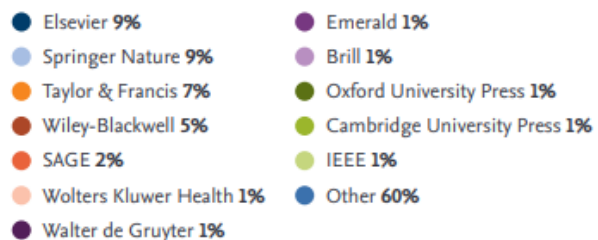

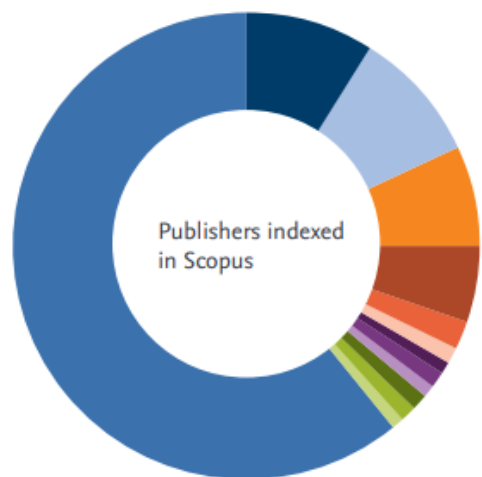

# پوشش محتوایی ( Document types )

❖ در حاضر ۹۰.۶ میلیون رکورد را پوشش می دهد. این رکوردها شامل موارد زیر می باشند:

Article, Article-in-Press, Book , Chapter, Conference Paper, Data paper , Editorial ,  
Erratum, Letter, Note, Retracted article, Review, Short survey

❖ از جمله ناشران معروف در این پایگاه نمایه می شوند:

Wolters Kluwer, Emerald, SAGE ,Wiley-Blackwell, Springer Nature, Taylor & Francis, Elsevier

## Document types covered in Scopus

Document type	Definition
<b>Article</b>	<p>Original research or opinion.</p> <p><b>Characteristics:</b> Articles in peer-reviewed journals are usually several pages in length, most often subdivided into sections: abstract, introduction, materials &amp; methods, results, conclusions, discussion and references. However, case reports, technical and research notes and short communications are also considered to be articles and may be as short as one page in length. Articles in trade journals are typically shorter than in peer-reviewed journals, and may also be as brief as one page in length.</p>
<b>Article-In-Press (AIP)</b>	<p>Accepted article made available online before official publication (see section 5).</p>
<b>Book</b>	<p>A whole monograph or entire book.</p> <p><b>Characteristics:</b> Book type is assigned to the whole. Additionally, for books with individual chapters, each chapter, along with a general item summarizing the book, is also indexed with the source type Book.</p>
<b>Chapter</b>	<p>A book chapter.</p> <p><b>Characteristics:</b> A complete chapter in a book or book series volume where the item is identified as a chapter by a heading or section indicator.</p>
<b>Conference paper</b>	<p>Original article reporting data presented at a conference or symposium.</p> <p><b>Characteristics:</b> Conference papers are of any length reporting data from a conference, with the exception of conference abstracts. Conference papers may range in length and content from full papers and published conference summaries to short items as short as one page in length (also see section 2.1).</p>
<b>Data paper</b>	<p>Searchable metadata documents describing an online accessible dataset, or group of datasets.</p> <p><b>Characteristics:</b> The intent of a data paper is to offer descriptive information on the related dataset(s) focusing on data collection, distinguishing features, access, and potential reuse rather than information on data processing and analysis.</p>
<b>Editorial</b>	<p>Summary of several articles, or provides editorial opinions or news.</p> <p><b>Characteristics:</b> Editorials are typically identified as editorial, introduction, leading article, preface or foreword, and are usually listed at the beginning of the table of contents.</p>
<b>Erratum</b>	<p>Report of an error, correction or retraction of a previously published paper. The erratum notice is linked to the original published paper this concerns and vice versa.</p> <p><b>Characteristics:</b> Errata are short items citing errors in, corrections to, or retractions of a previously published article in the same journal to which a citation is provided.</p>

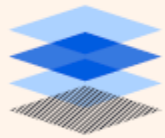

Document type	Definition
<b>Letter</b>	<p>Letter to or correspondence with the editor.</p> <p><b>Characteristics:</b> Letters are individual letters or replies. Each individual letter or reply is processed as a single item.</p>
<b>Note</b>	<p>Note, discussion or commentary.</p> <p><b>Characteristics:</b> Notes are short items that are not readily suited to other item types. They may or may not share characteristics of other item types, such as author, affiliation and references. Discussions and commentaries that follow an article are defined as notes and considered to be items in their own right. Notes also include questions and answers, as well as comments on other (often translated) articles. In trade journals, notes are generally shorter than half a page in length.</p>
<b>Retracted article</b>	<p>Published articles that the author(s) or publisher has requested to retract. The erratum or retraction notice announcing the retraction is linked to the retracted article.</p> <p><b>Characteristics:</b> Articles with a published retraction note will be updated to the document type "Retracted." Usually, these articles are indicated with the words "retracted" or "retraction".</p>
<b>Review</b>	<p>Significant review of original research, also includes conference papers.</p> <p><b>Characteristics:</b> Reviews typically have an extensive bibliography. Educational items that review specific issues within the literature are also considered to be reviews. As non-original articles, reviews lack the most typical sections of original articles such as materials &amp; methods and results.</p>
<b>Short survey</b>	<p>Short or mini-review of original research.</p> <p><b>Characteristics:</b> Short surveys are similar to reviews, but usually are shorter (not more than a few pages) and with a less extensive bibliography.</p>

**i** Improved Citescore

We have updated the CiteScore methodology to ensure a more robust, stable and comprehensive metric which provides an indication of research impact, earlier. The updated methodology will be applied to the calculation of CiteScore, as well as retroactively for all previous CiteScore years (ie. 2018, 2017, 2016...). The previous CiteScore values have been removed and are no longer available. [View CiteScore methodology.](#)

# ایجاد اکانت و امکانات پروفایل اسکاپوس

The screenshot displays the Scopus website interface. At the top left is the Scopus logo. The navigation bar includes 'Search', 'Sources', 'SciVal', and a user profile icon labeled 'ME'. The main content area features a 'Start exploring' section with the text 'Discover the most reliable, relevant, up-to-date research. All in one place.' Below this are navigation tabs for 'Documents', 'Authors', 'Researcher Discovery' (marked as 'New'), and 'Affiliations'. A search bar is present with a dropdown menu set to 'Search within Article title, Abstract, Keywords' and a search button labeled 'Search documents'. Below the search bar are links for '+ Add search field', '+ Add date range', and 'Advanced document search >'. At the bottom of the main content area, there are tabs for 'Search History' and 'Saved Searches', and a message: 'Start searching and your history will appear here. If you need help to start searching, see our [search tips](#).' On the right side, a user profile dropdown menu is open, showing the user's name 'maedeh esmailzadeh', email 'maedeh.esmailzadeh.1993@gmail.com', and a 'View my author profile' button. Below this are several menu items: 'My Scopus', 'Saved lists', 'Saved searches', 'Alerts', 'Export preferences', and 'Requests (Dashboard)'. At the bottom of the dropdown are 'My Elsevier', 'Privacy center', 'Elsevier account', and 'Sign out'.
